## Performance Fees

The performance fee is calculated after the deduction of any applicable investment fees and before any administration fees or adviser service fees.

Performance fees are subject to a Managed Portfolio outperforming a benchmark or a high-water mark. The formula ensures the Investment Manager is only rewarded for fresh outperformance. Any underperformance of the Managed Portfolio from the high- water mark is carried forward and the underperformance must be recouped before a performance fee can be charged for a subsequent outperformance.
